

AMERICAN

STEEL PIPE

THE RIGHT WAY

Dear Visitor,

AMERICAN Steel Pipe is looking forward to your arrival. Please read the attached safety brochure and note the plant can be warm and dusty. We recommend wearing pants and dark colored, breathable clothing. Sturdy, closed-toe shoes, such as tennis shoes, hiking boots or steel toe boots are required in the plant.

If you are driving, our address is 1501 31st Avenue North, Birmingham, Alabama 35207. If you have any questions contact your sales representative or call us at 800-326-7745 or 205-325-7742.

AMERICAN Steel Pipe

Welcome and Safety Guidelines

About AMERICAN

- AMERICAN Cast Iron Pipe Company was founded in Birmingham, Alabama, in 1905, by John J. Eagan, who believed in doing business by the Golden Rule: Treat others the way you want to be treated.
- In 1962, the company diversified, adding ERW steel pipe to its product line. Today, AMERICAN Steel Pipe makes API line pipe in diameters from 12 ¾ inches to 24 inches, in lengths up to 80 feet.
- AMERICAN is known for its continuous improvement and world-class facilities. In 2015, AMERICAN Steel Pipe completed a \$70-million expansion, including a new 150,000-square-foot processing facility and upgrades to its two mills.
- In addition to ERW steel pipe, AMERICAN manufactures ductile iron pipe, spiral-welded steel pipe, fire hydrants and valves for the waterworks industry; static castings for the agriculture and mining industries; and high-performance fire pumps for the firefighting industry.
- AMERICAN employs about 2,600 people at its headquarters in Birmingham and our six subsidiary plants across the country.
- AMERICAN is committed to the safety and wellbeing of our workforce, boasting a nationally recognized wellness program and Eagan College, which offers all employees opportunities for personal and professional development.

At AMERICAN, we do it safely or not at all.

Welcome to AMERICAN. We're glad to have you as our guest. To ensure your safety and the safety of those around you, we ask that you observe the following safety guidelines while onsite.

Parking and Building Access

- Please display your parking pass on the dash of your vehicle and wear your visitor's badge where it can be easily seen.
- Park only in authorized areas and use designated entrances and exits to the plant. Roll up doors are for vehicles only.
- Use of video equipment, cameras or cell phone photography is strictly prohibited unless authorized in advance.
- Smoking is permitted only in designated smoking areas outside buildings.
- Firearms and other weapons are strictly prohibited in all work areas of campus.
- Upon entering a building, please sign in and wait in the lobby. The employee you're visiting will meet you in the lobby.

What to Wear

- Long pants and casual shirt or t-shirt should be worn. Also, flat sturdy, closed-toe, closed-heel shoes must be worn in the manufacturing areas of the plant.
- Other Personal Protective Equipment – a hard hat, ear plugs and safety glasses – will be provided by AMERICAN and is required to be worn in all manufacturing areas of the plant.

Traffic – Stop, Look and Listen

- Obey all posted speed limit and traffic signs. Yield right of way to fork lifts and other heavy equipment and give them wide clearance, mindful that operators may have a restricted view and be unable to see vehicles and pedestrians.

While Touring the Plant

- Use doors to enter and exit buildings and stay on designated walk ways.
- Use handrails and do not touch equipment or manufactured products, which may be extremely hot and/or sharp.
- Be mindful of slip, trip and fall hazards; and moving overhead equipment such as cranes and hoists.

In case of an emergency, contact Plant Protection by using any in-house phone to dial 8000 or a cell phone to call 205-325-8000.

Emergency Procedures

Tornado/Shelter

- In the event of bad weather, Plant Protection will monitor conditions and sound campus tornado sirens if employees and guests should take shelter. AMERICAN's public address system will also provide audible warnings. Your escort will guide you to the nearest shelter. Please remain sheltered until Plant Protection sounds the all clear. (This is a low-pitch sound that is distinctively different from the high-pitch warning sound.)

Fire/Evacuation

- In the event the building you are in is evacuated, follow your escort or a posted evacuation map to the designated assembly point outside. Wait here. Plant Protection will ensure everyone is accounted for and will signal when it is clear to re-enter the building.
