

AMERICAN Flow Control IP16S Direct Mount Indicator Post

AMERICAN

FLOW CONTROL

THE RIGHT WAY

IP16S Direct Mount Indicator Post

FEATURES

- Easily adjustable and corrosion resistant target carrier system
- Stainless steel operating nut and bronze target plate carrier
- Aluminum target plate with stamped valve size for easy adjustment of target to match valve size
- UL Listed and FM Approved
- No plastic components in target system

BENEFITS

- Open-Shut Indication - provides visual indication of OPEN/SHUT for NRS gate valves
- Easily Adjustable - removal of the post head exposes the target carrier system for the "OPEN" and "SHUT" signs. The sliding SHUT target sign is easily adjusted to a corresponding valve size stamped on the aluminum target plate
- Allows for Enhanced Security - IP16S allows for the addition of a lock and/or tamper switch to aid in securing the system

SAMPLE SPECIFICATION

- All non-rising stem (NRS) gate valves installed above ground shall be furnished with a Direct Mount Indicator Post.
- The indicator post shall be easily adjustable and employ a corrosion resistant stainless steel op-nut and all metallic target carrier system.
- The target carrier shall be stamped with the valve size for easy adjustment of the target.
- The Direct Mount Indicator Post shall be of an all metallic design, no plastic components shall be allowed.
- All Indicator Posts shall be UL Listed and FM Approved.
- All Indicator Posts shall be capable of being locked and allow for the addition of a tamper switch.
- All Direct Mount Indicator Posts shall be the model IP16S by AMERICAN Flow Control.
